Summary

Detail-oriented Mechatronic Engineering Graduate with a strong foundation in automation, robotics, and electro-mechanical systems. Proven ability to quickly master complex practical skills and adapt to dynamic engineering environments. Dedicated to applying technical knowledge to solve real-world problems and drive project efficiency. Highly interest in Research & Development(R&D) job.

Experience

Engineering Intern, TechCapital Resources Sdn. Bhd. (T-Robot) – Selangor, Malaysia Oct 2025 – Jan 2026
Robotic solution design engineering company

- Prepared plans and proposals for new project tendering
- Checked stock inventory and calculated required material and equipment purchases
- Communicated with stakeholders, submitted relevant documents, and managed follow-ups
- Customized workstation designs, assembled equipment, tested systems, and troubleshoot issues
- Performed on-site technical installations

Engineering Intern, GN Engineering Sdn. Bhd. – Kuala Lumpur, Malaysia June 2023 – Oct 2023
Air conditioning and mechanical ventilation (ACMV) construction company

- Managed site progress documents, client comments, purchase order lists, and human resource management records
- Measured ACMV systems on scale drawings and calculated equipment and material quantities and costs
- Updated AutoCAD 2D drawings for ACMV systems according to actual site building designs
- Visited construction sites to perform data collection, hands-on testing, and troubleshooting
- Arranged manpower, supervised site work, and inspected project progress

Project

Final Year Project

Building production line simulation model and analysis through visualisation of system behaviour with different zoning strategies by using open source software.

Education

Tunku Abdul Rahman University of Management and Technology Jan 2023 – Nov 2026
Bachelor of Mechatronics Engineering With Honours
Kuala Lumpur, Malaysia

- CGPA: 3.1207/4.0

Tunku Abdul Rahman University of Management and Technology Jan 2021 – Nov 2023
Diploma in Mechatronic Engineering
Kuala Lumpur, Malaysia

- CGPA: 3.1867/4.0

Skills

Languages: English, Malay, Mandarin

Software & Engineering Tools:

Python, C/C++, HTML, Node-RED, MySQL Workbench, AutoCAD, SolidWorks 3D, Multisim, Proteus 8, Automation Studio, GX Works, AVEVA Edge Studio, CNC Programming, MPLAB, LogixPro, 3D Print, Microsoft Project, Microsoft Office

Soft Skills: Communication, Teamwork, Work Discipline

Judgement in AI Usage:

Using AI as assistant

Give clear instruction and objective in prompting

Evaluate AI's answer and do fact check

Guiding AI toward the correct path

Utilise AI for improving work productivity and efficiency
